EXPERIENCE

Miva, Inc., Remote — *Lead Web Developer*

MARCH 2014 - PRESENT

Full stack engineer responsible for end-to-end web site, and web application development.

Collaborated with the software department, and developed a module for Miva Merchant (Points & Loyalty).

Daily tasks include, but are not limited to: leading and building website redesigns, developing custom website features, maintaining and updating websites, API integrations, direct communication with clients and third-parties.

Developed 12+ Software Modules within Professional Services.

Managed a team of 10+ developers.

Freelance — *Web Developer*

JULY 2011 - PRESENT

Miva Merchant Modules

Developed the following Software Modules: Component & Layouts, Product Reviews, Add-on Product Multiplier, Waitlist, Questions & Answers, Transients, and Veracore Integration.

Bare Bones Broth

Replatformed the eCommerce site from WooCommerce, to Miva Merchant. Updating, maintaining and developing custom website features, and built an integration for their fulfillment center. Developed a new website, and worked directly with their designer when Bare Bones Broth rebranded.

Red Door Interactive, San Diego, CA — *Technology Intern*

JUNE 2013 - AUGUST 2013

Updated client WordPress & OOP based sites, which included Rubio's, and Univision Tarjeta.

Created a Launch Calendar web application by writing a drupal module to keep records of updates to client websites.
